In order to be considered and to merit a written response, comments must be in writing (paper or electronic format), substantive, and timely. Substantive comments do one or more of the following:

- question, with reasonable basis, the accuracy of information in the draft SEIS;
- question, with reasonable basis, the adequacy of, methodology for, or assumptions used for the environmental analysis;
- present valid new information relevant to the analysis;
- present reasonable alternatives other than those analyzed in the draft SEIS; or
- cause changes or revisions in one or more of the alternatives.

Comments that are not substantive generally contain only opinion or preferences but will be considered and included as part of the decision-making process. They will not, however, receive a formal response from the BLM. Comments that are not considered substantive include the following:

- comments in favor of or against the Proposed Action or alternatives that do not include reasoning that meets the criteria listed above;
- comments that only agree or disagree with BLM policy or resource decisions and that do not include justification or supporting data that meet the criteria listed above;
- comments that do not pertain to the project area or the project; or
- comments that take the form of vague, open-ended questions.
